

ABSTRACT

A disposable absorbent liner for use in a crotch portion of underwear. The liner includes a cover layer having a top surface and an opposite bottom surface and comprising a mixture of hydrophilic microfibers and hydrophobic microfibers. A quantity of hydrophilic microfibers and hydrophobic microfibers are located at the top surface and a larger quantity of hydrophobic microfibers are located at the top surface than are a quantity of hydrophilic microfibers located at the top surface based on a total weight of the mixture of microfibers in the cover layer. The liner also includes a removable backing layer, and a liquid impermeable baffle layer having a top surface and an opposite bottom surface with the baffle layer being disposed between the cover layer and the backing layer. The absorbent liner has a low profile and a particular Absorbent Capacity and/or Absorbent Intake Rate.
